14.7 Answers to Check Your Progress

14.8 Model Questions

14.1 LEARNING OBJECTIVES

After going through this unit, you will be able to

- describe the role of teacher in population education
- explain the duties and responsibilities of teacher in imparting population education

14.2 INTRODUCTION

Population education is an important programme which needs to be implemented in the whole world. For implementation of any educational programme and its effectiveness depends upon largely on the teachers. A teacher is considered as the important agent of social change. S/he is the destiny maker of a country. S/he is a torch bearer to the society. The future of the nation smiles on the various roles that the teacher performs by extinguishing the darkness of ignorance and ignited the light of knowledge in the society. Regarding the rapid growth of population s/he can play an influential role and motivate the people for active participation insolving this burning issue. The teacher can bring awareness among all section of people of the society about the consequences of population growth. S/he should inspire the students about the population dynamics, population hazards and role of young people in controlling population explosion in future. S/he can teach the students about the importance of small family norms. S/he can inspire the people of the society to

participate in various population controlling programmes. So, in this unit we are going to discuss what roles a teacher can perform for successful implementation of population education programmes in society.

14.3 ROLE OF TEACHER IN POPULATION EDUCATION

Teachers not only serve education among students but also play role in nation building. He is the leader of the community. National Policy on Education (1986) boldly opined “No people can rise above the level of its teachers.” Teachers are architects of the nation.Many teachers are considered as leader in their villages. So, they can motivate the people to adopt ‘small family norm’, provide information about the measures to be taken to control the growth of population.

Population education is a new area. It involves the inculcation of attitudes and values in addition to specific knowledge and information, it is necessary for teachers to be convinced of the need for a small family norm for the betterment of the society. The following roles can be identified for teachers in imparting population education:

- Teachers are the backbone of any country. S/he can eradicate blind faith, superstitions, dogma etc. from our society. In the parents-teacher association meetings/he can say about the benefits of small family norm, proper health and hygiene of family, bad effects of rapid growth of population, various measures of controlling birth, nutrition and adult education. S/he can adopt some programmes to check population growth in his/her locality with the help of guardians of the students.
- Generally, population education, being behavioural and multidisciplinary in nature, has a great potential to learn or to find out how best we can impart value system, inculcate socially desirable attitude and proper habits towards population growth. A teacher can play an important role in developing right kind of value system, inculcating socially desirable attitude and proper habits among students towards the issues related to rapidpo pulation growth and its solution.
- As a teacher s/he should explain to the students that population education is not sex education or family planning. It is a programme of social responsibility. The individual decision will result in our enhanced quality of life for all.
- Teachers exposure to population related issues will help both students and the community in changing their attitude and behaviour in a right direction.
- In the school situation teacher should conduct various governmental and non-

governmental programmes aiming at creating awareness among students about population education.

- The teacher should keep relation with the illiterate parents of the locality and their family environment. S/he can make understand these poor illiterate parents how population control or small family helps them to ensure the good future of their wards as well as their quality of life.
- Teacher should inform the community people about the problems of population growth.

t ACTIVITY-14.1

Visit area of your locality and collect data regarding numbers of family member, their educational status, economic conditions and their standard of living.
